## Shift 2 Unleashed Full Game - Site File!

A: The game runs fine for me (AMD RADEON X850 XT Platinum Edition; Windows 7 64-bit; 8 GB RAM), as follows: Windows 7 32-bit Processor: Intel Core 2 Duo E6600 2.4GHz / AMD Athlon 64 X2 Dual Core 4200+ Graphics: AMD Also, it did not crash in my game, but it was rather laggy (suggesting potential driver problems). There is no support for Windows XP 32-bit (but apparently you can use patches for the game, see here), a good balance of polyunsaturated and saturated fatty acids has never been shown to have any benefits for glucose metabolism. The authors do not mention here that for the most part this was a trial based on intention to treat. In a traditional randomized trial, interventions and outcomes are randomized. Here, interventions and outcomes are not randomized. What is randomized is the treatment assignment. So, there is simply no way to identify and record who started with the almond diet and who started on the control diet. Also, the almond diet was designed to be non-pharmacologic. The components of the diet have been shown to lower cholesterol, blood sugar, and inflammation. These studies are rigorously conducted trials. But they are hard to interpret in the context of the patient presented in this paper. Are the authors suggesting that using nutritional interventions on the basis of nutritional biomarkers (like a low SF diet) for the treatment of type 2 diabetes may be the path forward? Reviewer #2: I am satisfied with the revised manuscript and agree with the reviewer that the authors have now addressed most of my concerns. However, I still believe that a few clarifications have to be provided, and also that the title, Abstract, and Introduction should be changed/reformulated. The abstract and introduction (and title) do not reflect the novelty of this paper, although I appreciate the authors efforts to provide a well-balanced review of literature. 1) I think it is better to restrict the last sentence of the Abstract to the words "This is the first study that provides evidence for improved treatment outcomes with a low saturated fat dietary intervention for patients with type 2 diabetes." 2) Regarding the section of the results, I think the authors have poorly explained the intervention; moreover, this information is included only in the Methods section. 3) The Authors should explain in
